

Protection of Nitrile. Sensitivity of Latex.

KIMTECH PURE* G3 and G5 STERLING* Nitrile Gloves

Better Performance, Better for the Environment and Better Value.

Introducing the KIMTECH PURE* G3 and G5 STERLING* Nitrile Gloves, designed to offer superior strength versus competitive gloves. Consistent with our controlled environment products (e.g., masks, apparel, wipers and gloves), they are manufactured to exacting quality standards with rigorous process controls. Compared to traditional latex and nitrile gloves, the new KIMTECH PURE* G3 and G5 STERLING* Nitrile Gloves offer:

Better Performance, Better for the Environment and Better Value.

- G3 is recommended for ISO Class 3 or higher cleanrooms
- G5 is recommended for ISO Class 5 or higher cleanrooms
- Natural rubber latex-free, reducing the potential for TYPE 1 glove-associated reactions
- Static dissipative in use
- Certificate of Analysis (by lot) available online
- Online Trend Data (for G3 gloves) demonstrates product quality over time

KIMTECH PURE* G3 and G5 STERLING* Nitrile Gloves

Better Performance

The STERLING* Glove Technology combines the protection of nitrile with the sensitivity of latex. Our manufacturing process boosts the glove's tensile strength (the force required to break through the glove) to increase its already superior barrier protection. The process also allows a reduction in glove thickness, so less force is required to stretch the material. The result is a latex-free glove with the dexterity and sensitivity of latex.

Better Value

These innovative gloves lower waste without sacrificing strength, comfort or protection. Improved performance means a better value for you and your business.
